

Dear FCC,
Why should I as a paying subscriber to XM radio not be able to recieve weather and traffic information?

XM radio provides better signal, more variety and and I pay for the service. I hardley ever listen to regular radio now, because XM is so much better.

Please reject NAB petition 04-160, because I do not understand why a special interest group like this can stop me from getting traffic and weather, when I am paying for it.

Sincerely,

Kevin Dunn
